

Custom Size

Vinyl Floor Cloth Information

If a standard size vinyl floor cloth doesn't fit your space, don't worry, custom sizes can be made in most cases. Prices for a custom size are slightly higher per square foot than the standard sizes.

There is also a design fee of \$14 or \$49 depending on the type of change.

Hopefully this page will provide the information you need to help make your decision.

PLEASE contact me, Daren, for any questions about custom.

daren@puravidahg.com or call 781-444-4037

The COMPLETE design has to fit into your requested size.

The designers do not 'cutoff' any pattern to make it fit into your size.

There are two types of changes as described below.

Proportional Size Changes (\$14)

This is when a standard size is increased or decreased proportionally to the image. It's like adjusting a picture size on a computer by grabbing the corner and expanding or decreasing the size of the picture. Design fee is \$14 plus the cost of the vinyl.

Proportional changes are available for **ALL** collections.

Square and Round: We can make any size square or round to the inch starting at 36"x36" (3'x3') up to 120"x120" (10'x10')
For example: 64"x64", 55"x55", 112"x112", etc...

Custom Oval sizes are available by cropping it from a rectangle size.
(Not available in Williamsburg, Folk Art, and Biltmore collections)

Proportional size changes look like this. (Note the pattern does not repeat.)

Non-Proportional Size Changes (\$49)

(Not available in Williamsburg, Folk Art, and Biltmore Collections)

Increasing one side's measurement without increasing the other side proportionally.

(This is when you add more rows to length but not the width, or vice versa.)

Design fee is \$49 plus the cost of the vinyl.

Only **Classic** and **Mosaic** collection vinyl cloths with a **repeating design** can be used.

These patterns will **NOT** work and available only in **proportional changes**.

1, 18, 22, 30, 36, 38, 39, 40, 44, 50, 58, 61, 62, 64, 69, 75, 76, 77, 83, 84, 85

Example of Non-Proportional size change (making it longer but not wider)

Example: standard size 36"x115" made into a 36"x168"

Other examples of designs with a repeating pattern:
